

To whom it may concern

Ballerup, 16/03 2020

In addition to previous actions, we are increasing our Corona containment activities.

Although no Resino employees have any symptoms of COVID-19, we are now acting to secure manufacturing at Resino.

We have separated all employees in 2 teams without any contact, the aim is to reduce the risk of infection spreading to the entire company, resulting in closure.

Working in 2 teams, we expect to maintain manufacturing, but capacity with ½ manpower is somewhat reduced and therefore you may experience occasional delays compared to normal.

We are well covered with raw materials for the coming months, that is not a limitation, providing orders remain at normal levels.

Alcohol solvents are currently under pressure (as you know, hand disinfection is sold out etc), we monitor this closely and expect supplies to be sufficient.

Shipping is an issue outside our control. We may be exposed to truck availability problems, border crossing limitations, but at this moment transport is not limited.

To increase safety, we recommend you to place your orders with a lead-time of 1-2 weeks.

We hope the risk will pass during the coming weeks and we look forward to return to a normal situation

If you have any further questions, you are very welcome to contact me or your local Resino contact.

Thanks for your understanding and support.

Yours Sincerely
Resino Trykfarver AS

Niels Nielsen
V.P. Commercial Director
